goodgraphics.xyz/aubs

I've been talking about it for a while and now it's up. The first web app from Good Graphics. It's a tiny piece of software that serves a single purpose: provide you with some screensavers from your devices. If you recall, this is the reason the "Exclusive Digital Goods" reward was removed from the tiers. This solution is way more open and you can choose and customize the backgrounds you want (once I add some more features). Also its available to everyone and not just those that can afford to support the project. Well theres tons to do and not enough time! See you this weekend with an update

-Mello

P.S. - Yes it is named after my wonderful partner. I try to name one piece of software after them in every project I do. I'm a simp + partner person at heart.
