JAKE-CLARK.TUMBLR

## In non-meme Form

This newsletter is a lofi-community. There aren't likes or shares or reblogs, just links. My first system for sending links was via an excel sheet that I made for Aubrie. Overtime I started dropping into friends inboxes and DMs with links and eventually merged all of that into this newsletter. I don't expect anyone to read the random things I send, but I do appreciate you for signing up. (I also wouldn't be mad at ya for telling a friend or two ( or three ( or four ( though don't tell 5 because that gets into chain letter territory))))

This newsletter is a home cooked meal for friends and strangers. While most of the internet might feel like empty calories optimized to be shoved into your face, I wanted to create a sense of randomness on the web. (But still bound to my algorithm as you can probably guess there are themes and continuity to my interests.)

This newsletter is for me. I use it to process what I read and also to entertain. Awhile back when this project was changing from "Mello World" to "Mello Today" I went radio silent. I was working on turning this into a bigger and more ambitious project.
